

# Explosion Proof 2/2 Directional Valve, Solenoid Operated, Poppet Type, Piloted

**SD3EX-B2**

7/8-14 UNF •  $Q_{max}$  75 l/min (20 GPM) •  $p_{max}$  420 bar (6100 PSI)

## Technical Features

- › 2/2-screw-in cartridge poppet valve with 7/8-14 UNF connection thread
- › High tightness of the closed valve
- › Maximum operating pressure 420 bar
- › Certification of solenoid coil ATEX (Directive 2014/34/EU) and IECEx, valid for mines and environments with potentially explosive atmospheres consisting of gases or dust
- › Coil protection by encapsulation "m" for gases and by flameproof enclosure "t" for dust
- › Robust design resistant to mechanical damage
- › Protection against static discharge by grounding the valve surface
- › Valves applicable for temperature classes T4 (135 °C), T5 (100 °C) and T6 (85 °C) depending on maximum ambient temperature
- › Optional coil supply voltage, valve connection and type of manual override
- › The valve is zinc coated for 520 h corrosion protection in NSS acc. to ISO 9227 and as protection against ignition spark in the event of mechanical impact

## Product Description

Pilot operated screw-in cartridge poppet valve, operated by solenoid. The valve is designed to dam the flow of liquid and stop the appliance. The valve is certified for use in potentially explosive atmospheres of gases, vapours, dust and fugitive particles with a high protection level EPL = b.

## Use of the valve in potentially explosive atmospheres

\*CCC certification (China Compulsory Certification) for the People's Republic of China does not apply to the equipment group I intended for use in mines  
\*\*EAEU=Eurasian Economic Union, certificate according to TR TS 012/2011 valid for the Russian Federation, Belarus, Armenia, Kazakhstan and Kyrgyzstan.

- Besides the valve versions shown, which are the most frequently used, other special versions are available.  
- Consult our technical department for their identification, feasibility and operating limits.

# Manual Override in millimeters (inches)

No designation - standard for 202 only	N7 - detent assembly for 202 only	N9 - without manual override
		

In case of solenoid malfunction or power failure, the valve poppet can be shifted by manual override under the condition that the pressure in the back line does not exceed 25 bar (363 PSI).

## Information for customers

- › Before installing the product, please read the Product Instructions for Use, which is available in full on the manufacturer's website ([www.argo-hytos.com](http://www.argo-hytos.com)) near the data sheet. Please also pay attention to the chapter describing the target user group, their professional qualifications and medical fitness to install, use and repair the product.
- › The product may only be used in the zones indicated, otherwise there is a risk of initiating an explosion

## Area of application

Equipment - group I – MINES	Equipment - group II (IIG) - GAS		Equipment - group III (IID) - DUST	
Category M1 – NO	Zone 0 - NO		Zone 20 - NO	
Category M2 (the device remains switched off)	Zone 1	IIA (propane)	Zone 21	IIIA (combustible particles)
	Zone 2	IIB (ethylene)	Zone 22	IIIB (non-conductive dust)
		IIC (hydrogen)		IIIC (conductive dust)

- › For use in the temperature class, the maximum ambient temperature (see technical data table) must be observed for a given coil input (10 W), the maximum temperature of the working fluid 70 °C and the nominal voltage of the coil supply.
- › The user must ensure free heat dissipation from the valve surface. The surface must not be covered, exposed to a heat source or direct sunlight. When mounting the valves in groups, observe the minimum distances specified in the Instructions for Use.
- › A certified cable of temperature insulation class corresponding to the application temperature class must be used to the electrical connection of coil with DC supplying.
- › The rectifier and terminal block of coils with AC supplying are protected with encapsulation. Therefore, these coils are only supplied with mounted cable. No modification to the connected cable are allowed except for shortening the cable to a suitable length and fitting a connector to the free end.
- › The valve surface must be grounded using the screw on the terminal box cover of coil to prevent electrostatic discharge.
- › It is forbidden to install, dismantle or repair the product in an explosive atmosphere. Repairs to the product shall be carried out by the manufacturer, except for repairs permitted by the user under the conditions specified in the Instructions for Use.
- › Attention! The surface of the coil and the valve gets hot during operation. There is a risk of skin burns if touched.
